SUMMARY

Results-driven AI/ML Engineer with strong proficiency in Python, Machine Learning, FastAPI, NLP, and Data Science. Experienced in developing LLM-based applications using Ollama, building scalable APIs, and implementing machine learning models through internships and hands-on projects. Skilled in data preprocessing, model training, evaluation, and deploying AI-driven solutions. Adept at problem-solving, delivering technical insights, and contributing effectively to collaborative development environments. Seeking to apply technical expertise and support innovation in a growth-oriented organization.

EXPERIENCE

Generative AI Intern

Finsocial Digital System

11/2024 – 06/2025
remote

- Developed and deployed **Generative AI and LLM-based applications** using **Ollama**, improving NLP automation and text-generation workflows.
- Built and optimized **FastAPI services** to serve AI/ML models with low latency and scalable API performance.
- Created and containerized **FastAPI applications using Docker**, enabling reliable deployment environments and simplified CI/CD processes.
- Designed and implemented **web scraping and data extraction pipelines** to support model training and business analytics.
- Collaborated with the engineering team to integrate **Generative AI solutions** into production systems, focusing on performance tuning, scalability, and deployment readiness.

Data Science Intern

Feynmlab

01/2024 – 04/2024
remote

- Developed and evaluated **machine learning models** for multiple real-world use cases, including data preprocessing, feature engineering, and model optimization.
- Performed **exploratory data analysis (EDA)** to identify trends, patterns, and actionable insights that supported data-driven decisions.
- Improved model performance using **hyperparameter tuning, cross-validation, and feature selection techniques**.
- Presented analytical findings and model outcomes to stakeholders, contributing to project strategy and solution refinement.
- Collaborated with team members to build **scalable, production-ready ML pipelines** and ensure smooth integration with downstream applications.

TECHNICAL SKILLS

Languages — Java, Python, C, C++, MySQL, HTML/CSS, JavaScript, SQLite, PostgreSQL, Redis, Django REST Framework, RESTful API Development, **Developer Tools** — Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Microsoft Office, **Libraries** — Pandas, NumPy, Matplotlib, TensorFlow, keras, Scikit-learn, OpenCV., **Other** — Machine Learning, RestAPI, data structure and Algorithm, Object Oriented Programming (OOPS), Reactjs., **Soft Skills** — Analytical thinking, Problem-solving, Time Management, Decision-making, Project management

PROJECTS

Hotel Booking System — Django, PostgreSQL (Deployed on Render)

09/2025 – 11/2025

Designed and deployed a production-ready hotel booking web application featuring secure user authentication, room availability management, and automated booking workflows. Implemented a robust backend using Django with a PostgreSQL database to ensure high reliability and scalability. Integrated dynamic UI features using HTML, CSS, and JavaScript for a smooth booking experience 📄

Tech Stack : Django, Python, PostgreSQL, HTML/CSS, JavaScript

Live Demo: <https://hotel-booking-system-6-83r2.onrender.com/booking/> 📄

Emotion Detection from Images

07/2024 – 08/2024

- Developed a Convolutional Neural Network (CNN) model to detect human emotions from facial images with high accuracy.
- The model recognizes emotions like happiness, sadness, anger, and surprise through real-time analysis of user-uploaded images.
- Tech Stack: Python, TensorFlow, OpenCV, Flask, CNN

IPL Scorecard Prediction

10/2023 – 12/2023

- Created a machine learning model to predict the final score of IPL cricket matches using historical match data.
- Utilized regression techniques to analyze patterns and improve prediction accuracy.
- Presented predictions and insights via a user-friendly interface for enhanced accessibility.
- Tech Stack: Python, Pandas, Scikit-learn, Matplotlib.

CERTIFICATIONS

Machine Learning — (Simplilearn)

EDUCATION

B.Tech 📄 **Computer Science and Engineering (Artificial intelligence and Machine learning)**

06/2020 – 06/2024
